

MENNA MAHER ELWAN

Flutter Developer | Mobile Application Developer

Egypt | 01127798986 | menna3lwan@gmail.com | linkedin.com/in/menna-elwan | github.com/menna3lwan

PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building cross-platform mobile applications using Flutter and Dart, with a strong command of Clean Architecture, BLoC, Provider, and Riverpod state management. Experienced in ERP feature development, Firebase integration, REST API consumption, push notifications, in-app messaging, and Paymob payment gateway integration, and in open-source Flutter packages such as PlutoGrid for large-scale, editable data grids. Delivered real-world projects across ERP, education, healthcare, AI, and e-commerce domains, with a focus on clean, scalable code and polished user experiences.

TECHNICAL SKILLS

Programming Languages: Dart, Flutter, Kotlin, Java, Python, C++, C

Mobile Development: Flutter, Android SDK, iOS Development, Cross-Platform Development, Native Android

Architecture & Patterns: MVVM, MVI, Clean Architecture, Repository Pattern, Dependency Injection, State Management (Provider, Riverpod, BLoC)

Backend & APIs: REST API Integration, Firebase (Authentication, Firestore, Cloud Messaging), Paymob Payment Gateway

ERP & Data-Heavy UI: ERP Feature Development, PlutoGrid Data Grids, Push Notifications, In-App Messages

Open Source: PlutoGrid (MIT-licensed Flutter DataGrid package) - integration, customization, and issue-driven collaboration on GitHub

Tools & Technologies: Git, GitHub, Azure, Android Studio, VS Code, Postman, Figma, UI/UX Design

Methodologies: SDLC, Waterfall, Agile, ISTQB Testing Frameworks

WORK EXPERIENCE

Flutter Developer | EXPR - ERP

Jan 2026 - Jun 2026 | Egypt

- Built and maintained ERP features using Flutter with Clean Architecture.
- Implemented large, editable ERP data tables using PlutoGrid, an open-source Flutter DataGrid package, covering custom column and cell types, sorting, filtering, and inline cell editing.
- Implemented push notifications and in-app messages using Firebase Cloud Messaging to support real-time ERP updates and user engagement.
- Integrated Firebase services for authentication and real-time data handling across ERP modules.
- Worked with Azure, Figma, and STG/DEV environments while ensuring code quality through unit testing.

Flutter Developer Intern | NTI

Dec 2025 - Feb 2026 | Egypt

- Collaborated using GitHub (pull requests, code reviews, branching strategy, and team-based workflows) while applying Clean Architecture principles in Flutter projects.
- Implemented unit testing and contributed to structured feature development within a scalable, maintainable architecture.

Software Development Intern | Dragons (Software with AI)

Aug 2025 - Feb 2026 | Egypt

- Applied AI technologies within real-world software projects.
- Developed innovative mobile solutions integrating artificial intelligence capabilities.

Flutter Developer Intern | Cellula Technologies

Jul 2025 - Aug 2025 | Egypt

- Developed cross-platform mobile applications using Flutter framework.
- Implemented REST API integration and optimized application performance.

Software Development Intern | Fuzetek

Feb 2025 - Apr 2025 | Egypt

- Gained practical experience in SDLC and ISTQB testing methodologies.
- Applied problem-solving techniques using Python and C++ through guided projects.

Mobile Developer Intern | Digital Egypt Pioneers Initiative (DEPI)

Jun 2024 - Dec 2024 | Egypt

- Developed mobile applications following industry best practices and design patterns.
- Ranked 7th nationwide in the Mobile Development track among all participants.

Coding Instructor | Almentor

Feb 2024 - Dec 2024 | Egypt

- Taught programming fundamentals and problem-solving techniques to students.

- Designed and delivered structured courses covering algorithms and data structures.

Flutter Developer Intern | Mindset

Aug 2024 - Sep 2024 | Egypt

- Created user-friendly mobile applications with clean UI/UX design.
- Implemented state management techniques using Provider and Riverpod.

OPEN SOURCE

PlutoGrid - Open Source Flutter DataGrid Package

Flutter, Dart, GitHub

- Worked with PlutoGrid, an MIT-licensed open-source Flutter package that provides a keyboard-operable data grid for web, desktop, and mobile applications.
- Customized the package within production screens by configuring column and row models, cell renderers, and grid events (onChanged, onLoaded) to match business requirements.

PROJECTS

MentorX - Intelligent Educational Platform

Flutter, REST APIs, WebSockets, AI

- Built Flutter applications for a multi-role educational platform serving students, parents, teachers, and administrators, each with dedicated flows, permissions, and dashboards.
- Consumed backend APIs for authentication, sessions, payments, real-time chat, notifications, and analytics, and surfaced AI-powered assistance for personalised learning support.

Hen Lehen - Women-Only Medical Platform

Flutter, Firebase, Supabase

- Built a full healthcare platform (patient & doctor apps) featuring appointment booking, online chat, clinic consultations, and an AI-powered chatbot for instant health guidance.
- Integrated Firebase authentication, real-time data handling, and role-based user flows.

Movie App

Flutter, REST API, Clean Architecture

- Developed a scalable movie browsing app with Clean Architecture, Repository Pattern, and Dependency Injection for production-ready modularity.

Fashion App

Flutter, REST API

- E-commerce app with product browsing, wishlist management, payment integration, and real-time order tracking.

Meal Recommendation App

Flutter, Gemini AI

- Built a Flutter app utilizing Gemini AI to recommend personalised meal recipes tailored to user goals and available ingredients.
- Delivered an intuitive UI with AI-driven recommendations, highlighting practical LLM integration in mobile development.

Weather Prediction AI App

Flutter, AI/ML, REST API

- Designed a Flutter app integrated with an AI model to predict weather conditions and determine if a user can safely proceed with outdoor activities.
- Implemented real-time weather data integration from an API, showcasing end-to-end AI and data pipeline skills.

Taskatk App

Flutter, Firebase

- Task management app with Firebase integration, push notifications, and a streak tracking feature to boost user engagement.

News App

Android, Kotlin, Firebase

- Real-time news application with personalised recommendations and Firebase integration.

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

Aug 2022 - 2026

Benha University | Egypt

- Hands-on software engineering coursework and team projects covering coding, testing, and debugging.

CERTIFICATIONS & ACHIEVEMENTS

- 7th Place Nationwide - Mobile Development Track | Ministry of Communication and Information Technology, December 2024
- ECPC Participant | Egyptian Collegiate Programming Contest, 2023
